The desired State-owned land consists of two non-contiguous parcels. The northerly parcel is a 100-acre area with nearly depleted sand, gravel, and stone quarry, which has been mined by the applicant. The southern 40-acre parcel is an undisturbed forested area that is very similar to the offered private land.

This transaction will contribute to the Department's Land Consolidation Strategy by acquiring lands which block in with other State-owned properties and by disposing of lands which provide comparatively few benefits to the Department's mission. This transaction will also enhance forest, recreation, and wildlife management potential.

The desired State-owned land was acquired by tax reversion in 1939.

The proposed exchange was reviewed and recommended for approval by the Land Exchange Review Committee on October 25, 2007. The Mineral and Land Management Section staff of the Department's Forest, Mineral and Fire Management Division has determined that the Department should retain its mineral rights to the desired State-owned land.

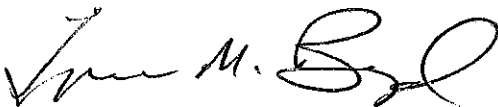

Recommendation: That the exchange be approved, under authority of Part 21, Act 451 of 1994, as amended, with the State reserving aboriginal antiquities and minerals.
